

Touch the Future of Healthcare™

Humantouch provides real-world solutions at the intersection of technology and consumer health.

- PatientTouch®; gathers a complete patient history on a wireless tablet in a waiting room, directly from the patient, quickly, accurately, and in multiple languages.
- Pass that data effortlessly to your existing EMR or use MDTouch®, our physician-facing solution for rapid digestion of your patients' medical history and presenting symptoms.
- Adapt the systems to your own practice-specific needs with our simple and intuitive Knowledge Worker Interface®.
- Patients effortlessly create / update their online personal health record at MyDrVisit.com.
